
This act summary is provided for the convenience of the public and members of the General Assembly. It is intended to provide a general summary of the act and may not be exhaustive. It has been prepared by the staff of the Office of Legislative Counsel without input from members of the General Assembly. It is not intended to aid in the interpretation of legislation or to serve as a source of legislative intent.

Act No. 167 (H.942). An act relating to miscellaneous agricultural subjects

Subjects: Water quality; agriculture; municipal and county government; Vermont agricultural products; product grades, standards, and labeling; unit pricing

This act makes several miscellaneous changes to laws pertaining to agricultural subjects. This act makes water quality training for farmers optional and makes changes to requirements for managing and applying non-sewage waste on farms. This act also makes several changes to price labeling for most retail establishments. Retail establishments are required to list the unit price and total selling price for most consumer commodities. Retail establishments are only permitted to change the price displayed on an electronic shelf label when a retail establishment is closed.

This act requires the Commissioner of Taxes to study and provide recommendations for including equine farming in the Use Value Appraisal Program. This act permits the Rural Economic Development Initiative to support projects statewide for community development initiatives that support agriculture, historic preservation, outdoor recreation, and other critical economic development needs. This act also makes a technical correction to the statute governing the Farm and Forestry Operations Security Special Fund to clarify that it is the Secretary of Agriculture, Food and Markets, in consultation with the Review Board, that makes award determinations.

Effective Date: July 1, 2026
